# دفتر Hub | AGENCY OS

All-in-One Operations & Project Profit Platform for Digital Agencies

**EXECUTIVE BRIEF**
- Zero DIY Setup
- Flat Predictable Rates
- Dedicated Database

**Why Agencies Switch from Generic PM Tools:** Generic tools (ClickUp, Asana, Jira) are blank slates requiring 40+ hours of custom setup and external subscriptions for attendance, client passwords, and project profit margins. **Daftar Hub** delivers an opinionated, ready-to-run agency operating system on Day 1.

## Head-to-Head Feature Comparison: Built-in vs Setup Required

Daftar Hub features are 100% pre-built for agencies. ClickUp and competitors require paid add-ons, complex formula rollups, or manual Zapier integrations.

| Operational Feature | Daftar Hub (Agency OS) | ClickUp Pro / Unlimited | Other PM Tools (Asana/Jira) |
|---|---|---|---|
| **Attendance & Overtime Punch Log**<br>Daily 1-click check-in, late arrival flags, audit log | ✔ Built-in & Ready<br>Ready on Day 1 | ✕ Not Supported<br>Requires 3rd-party app | ✕ Not Supported<br>Requires 3rd-party app |
| **Leave & Workload Auto-Deduction**<br>Approved leave automatically reduces project hours | ✔ Built-in & Connected<br>One unified record | ▲ Setup Required<br>Forms + Zapier webhooks | ✕ Not Supported<br>Calendar days only |
| **Live Profit Margin per Project**<br>Developer rate × logged hours = real margin live | ✔ Built-in (Owner Only)<br>Confidential & automatic | ▲ Setup Required<br>Rollup formulas & manual sync | ✕ Not Supported<br>Deals only, not dev cost |
| **Encrypted Password Manager**<br>AES-256 vault with reveal logs & exit auto-revoke | ✔ Built-in<br>Zero plain-text leaks | ✕ Not Supported<br>Requires 1Password ($5-8/seat) | ✕ Not Supported<br>Plain text in Slack/Sheets |
| **Developer Capacity & Workload**<br>See max tasks allocated vs available bandwidth | ✔ Built-in<br>Connected to leave schedule | ▲ Setup Required<br>Locked on Business Tier | ▲ Setup Required<br>Manual point estimates |
| **Pre-Configured Role Dashboards**<br>Distinct screens for Admin, HR, PM, and Developers | ✔ 4 Pre-built Dashboards<br>Zero permissions confusion | ▲ Setup Required<br>Must configure spaces/folders | ▲ Setup Required<br>Complex permission trees |
| **Dedicated Isolated Database**<br>Dedicated database instance per customer | ✔ Dedicated Database<br>Isolated Supabase project | ▲ Shared Multi-Tenant<br>Shared public cloud tables | ▲ Shared Multi-Tenant<br>Shared public cloud tables |
| **Setup Time & Implementation Effort**<br>Time required before your team can run on it | 0 Hours (Done For You)<br>Ready in 3 days with onboarding | 40+ Hours DIY<br>Weeks of configuration | 30+ Hours DIY<br>Perpetual maintenance |

**Pre-Configured (0h Setup)**
Attendance, leave schedules, developer rates, and workload work on Day 1 without building custom formulas.

**Native Connection**
Approved leave reduces sprint capacity; tracked hours update live project margins. Zero manual sync.

**Enterprise Security**
Your agency receives a dedicated database instance. Client passwords and staff salary rates stay 100% confidential.

# The Operational Core: 7 Modules & 4 Role Dashboards

A single unified system replacing 5 disconnected software subscriptions with zero information leakage.

## 1. The 7 Operational Modules (What They Do)

| Module Name | Target Role | Core Capability & Purpose |
|---|---|---|
| **1. Business Analysis** | **Owner / Admin** | Calculates live net profit and margins per project by multiplying logged hours by confidential developer hourly rates. Visualizes top revenue projects and category margins without Excel. |
| **2. Overview Module** | **Owner** | A high-level command view of agency momentum. See live task completion rates, active projects, employee presence, and department milestones in one consolidated view. |
| **3. Attendance & Leave** | **HR + Owner** | 1-click daily check-in/out from mobile or desktop. Automatically flags late arrivals (with reason log), early exits, and overtime. 60-second leave requests with an immutable audit trail. |
| **4. Projects Module** | **PM + Admin** | Organizes client projects category-wise (Mobile, Web, AI, Retainers). Tracks sprint deadlines, task deliverables, milestones, and progress without clutter. |
| **5. Password Manager** | **Admin Only** | Stores client production servers and API keys in an AES-256 encrypted vault instead of Google Sheets. Granular per-team permissions with copy/reveal logs and 1-click exit revocation. |
| **6. Time Tracking** | **Admin + PM** | Developers track billable time via an active timer or manual task entry. Shows who worked the most on each deliverable without weekly timesheet friction. |
| **7. Workload & Capacity** | **Admin + PM** | Inspects real developer capacity before delegating tasks. Approved leaves automatically deduct available project hours, preventing team burnout and blown deadlines. |

## 2. The 4 Dedicated Role Dashboards (Zero Information Leakage)

| Dashboard View | Target User | Permissions & What They See |
|---|---|---|
| **1. Admin Dashboard** | Owner / Director | Full executive command: project profit margins, developer cost rates, live business dashboard, password vault, workload distribution, and company-wide notifications. |
| **2. HR Dashboard** | HR Manager | People operations center: onboard new hires, manage employee profiles, organize team structures, approve leaves/WFH, and track daily attendance and working hours. |
| **3. PM Dashboard** | Project Manager | Project execution: view active projects, create and complete tasks, monitor real-time developer workload, and assign tasks directly to less workloaded team members. |
| **4. Employee Dashboard** | Developer / Designer | Focused personal workspace: view assigned tasks and sprint milestones, 1-click punch in/out, submit 1-minute leave requests, and track time spent per task. |

**Why Role Isolation Matters:** Developers never see sensitive financial margins or confidential developer hourly billing rates. HR manages attendance and leaves without accessing production client server credentials. Project Managers assign sprint tasks with full visibility into who is on approved leave. Complete operational control with zero leaks.

# Pricing Comparison: 10-Person Agency Team

Monthly cost and hours saved compared to ClickUp, HubSpot, Salesforce, and multi-tool stacks (PKR 280/USD).

| Platform / Tool Stack | Their Price / Mo<br>10 Team Members | Daftar Hub Price<br>10 Team Members | Cost Saved / Mo (%)<br>Direct Cash Retained | Time Saved / Mo<br>Admin Hours |
|---|---|---|---|---|
| **ClickUp Unlimited**<br>$10/user/mo billed monthly | PKR 28,000 / mo<br>$100 USD / mo | **PKR 12,000 / mo**<br>**Flat Rate** | **Save PKR 16,000 (57%)**<br>PKR 192,000 / year | **+18 hrs / mo**<br>**Attendance + leaves** |
| **ClickUp Business**<br>$19/user/mo billed monthly | PKR 53,200 / mo<br>$190 USD / mo | **PKR 12,000 / mo**<br>**Flat Rate** | **Save PKR 41,200 (77%)**<br>PKR 494,400 / year | **+18 hrs / mo**<br>**Vault + workloads** |
| **HubSpot Starter Suite**<br>$20/seat/mo list price | PKR 56,000 / mo<br>$200 USD / mo | **PKR 12,000 / mo**<br>**Flat Rate** | **Save PKR 44,000 (79%)**<br>PKR 528,000 / year | **+20 hrs / mo**<br>**Zero CRM bloat** |
| **Salesforce Starter Suite**<br>$25/seat/mo list price | PKR 70,000 / mo<br>$250 USD / mo | **PKR 12,000 / mo**<br>**Flat Rate** | **Save PKR 58,000 (83%)**<br>PKR 696,000 / year | **+20 hrs / mo**<br>**Internal ops ready** |
| **Typical Fragmented Stack**<br>ClickUp + 1Password + Attendance App | PKR 64,400 / mo<br>$230 USD / mo | **PKR 12,000 / mo**<br>**Flat Rate** | **Save PKR 52,400 (81%)**<br>PKR 628,800 / year | **+25 hrs / mo**<br>**No tool hopping** |

**Save 57% to 83% Cash**
Save PKR 16,000 to PKR 58,000 every single month for a team of 10. Direct cash retained on your agency's balance sheet.

**Save 18 to 25 Hours / Mo**
Eliminates manual timesheets, WhatsApp leave tracking, and Excel profit calculations. PMs and founders regain billable focus.

**Zero Per-Seat Growth Tax**
Predictable flat rate of PKR 12,000/mo. Onboard developers, interns, and designers without unexpected billing spikes.

**Starter Plan (Main Offer)**
**PKR 12,000 / mo** (up to 10 seats)
All 7 modules, password vault, dedicated DB, zero setup fee.

**Growth Plan**
**PKR 30,000 / mo** (up to 25 seats)
Multi-department workloads, priority support channel.

**Scale Plan**
**PKR 50,000 / mo** (up to 50 seats)
Custom backup scripts, priority custom integrations.

**LAUNCH PILOT SPECIAL:** Get **3 Modules 100% FREE in your first month** to test live with your agency team (includes setup & walkthrough). First 3 Founding Agencies get **50% off (PKR 6,000/mo)** when unlocking all 7 modules.

**Next Step: Schedule a 30-Minute Live Walkthrough**
Inspect live matching screens for a 10-person agency team with all 7 modules pre-configured. Zero obligation, no credit card required.
