CREWDESK | AGENCY OS

All-in-One Operations & Project Profit Platform for Digital Agencies

OPERATIONS SUITE
- 7 Core Modules Included
- 4 Dedicated Role Views
- Zero Setup Fee

Run your agency from one connected platform instead of 5 disconnected tools. Attendance, leaves, client passwords, developer workload, and real profit-per-project are unified on Day 1 without manual spreadsheets.

1. The 7 Operational Modules (What They Do)

Module Name	Target Role	Core Capability & Purpose
1. Business Analysis	**Owner / Admin**	Calculates live net profit and margins per project by multiplying logged hours by confidential developer hourly rates. Visualizes top revenue projects and category margins without Excel.
2. Overview Module	**Owner**	A high-level command view of agency momentum. See live task completion rates, active projects, employee presence, and department milestones in one consolidated view.
3. Attendance & Leave	**HR + Owner**	1-click daily check-in/out from mobile or desktop. Automatically flags late arrivals (with reason log), early exits, and overtime. 60-second leave requests with an immutable audit trail.
4. Projects Module	**PM + Admin**	Organizes client projects category-wise (Mobile, Web, AI, Retainers). Tracks sprint deadlines, task deliverables, milestones, and progress without clutter.
5. Password Manager	**Admin Only**	Stores client production servers and API keys in an AES-256 encrypted vault instead of Google Sheets. Granular per-team permissions with copy/reveal logs and 1-click exit revocation.
6. Time Tracking	**Admin + PM**	Developers track billable time via an active timer or manual task entry. Shows who worked the most on each deliverable without weekly timesheet friction.
7. Workload & Capacity	**Admin + PM**	Inspects real developer capacity before delegating tasks. Approved leaves automatically deduct available project hours, preventing team burnout and blown deadlines.

2. The 4 Dedicated Role Dashboards (Zero Information Leakage)

Dashboard View	Target User	Permissions & What They See
1. Admin Dashboard	Owner / Director	Full executive command: project profit margins, developer cost rates, live business dashboard, password vault, workload distribution, and company-wide notifications.
2. HR Dashboard	HR Manager	People operations center: onboard new hires, manage employee profiles, organize team structures, approve leaves/WFH, and track daily attendance and working hours.
3. PM Dashboard	Project Manager	Project execution: view active projects, create and complete tasks, monitor real-time developer workload, and assign tasks directly to less workloaded team members.
4. Employee Dashboard	Developer / Designer	Focused personal workspace: view assigned tasks and sprint milestones, 1-click punch in/out, submit 1-minute leave requests, and track time spent per task.

Feature Comparison: Crewdesk vs ClickUp Pro & Other PM Tools

Other tools are generic toolkits requiring 40+ hours of DIY setup and external paid subscriptions. Crewdesk is built for agency operations out of the box.

Operational Feature	Crewdesk (Agency OS)	ClickUp Pro / Unlimited	Other PM Tools (Asana/Jira)
Attendance & Overtime Punch Log Daily 1-click check-in, late arrival flags, audit log	✔ Built-in & Ready Ready on Day 1	✕ Not Supported Requires 3rd-party app	✕ Not Supported Requires 3rd-party app
Leave & Workload Auto-Deduction Approved leave automatically reduces project hours	✔ Built-in & Connected One unified record	▲ Setup Required Forms + Zapier webhooks	✕ Not Supported Calendar days only
Live Profit Margin per Project Developer rate × logged hours = real margin live	✔ Built-in (Owner Only) Confidential & automatic	▲ Setup Required Rollup formulas & manual sync	✕ Not Supported Deals only, not dev cost
Encrypted Password Manager AES-256 vault with reveal logs & exit auto-revoke	✔ Built-in Zero plain-text leaks	✕ Not Supported Requires 1Password ($5-8/seat)	✕ Not Supported Plain text in Slack/Sheets
Developer Capacity & Workload See max tasks allocated vs available bandwidth	✔ Built-in Connected to leave schedule	▲ Setup Required Locked on Business Tier	▲ Setup Required Manual point estimates
Pre-Configured Role Dashboards Distinct screens for Admin, HR, PM, and Developers	✔ 4 Pre-built Dashboards Zero permissions confusion	▲ Setup Required Must configure spaces/folders	▲ Setup Required Complex permission trees
Dedicated Isolated Database Dedicated database instance per customer	✔ Dedicated Database Isolated Supabase project	▲ Shared Multi-Tenant Shared public cloud tables	▲ Shared Multi-Tenant Shared public cloud tables
Setup Time & Implementation Effort Time required before your team can run on it	0 Hours (Done For You) Ready in 3 days with onboarding	40+ Hours DIY Weeks of configuration	30+ Hours DIY Perpetual maintenance

Already Set Up (0h)
Attendance, leave schedules, developer rates, and workload work on Day 1 without building custom forms or rollups.

Already Connected
Leave reduces project capacity; time tracked updates live project margins. One record, nothing copied between tools.

Dedicated Security
Your agency gets its own dedicated database instance. Client passwords and salary costs are completely isolated.

Pricing Comparison: Flat Rates vs Per-Seat Tools

Published list prices checked October 2026 (PKR 280/USD). Predictable flat tiers with zero per-seat penalty.

Platform & Plan	Their Price / Mo	Crewdesk Price	You Save / Mo	You Save / Year	Hours Saved
--- TEAM OF 10 PEOPLE --- (Starter Plan: PKR 12,000 / mo | ~$43 USD)					
ClickUp Unlimited (Billed Annually at $7/user)	PKR 19,600	**PKR 12,000**	**PKR 7,600 (39%)**	**PKR 91,200**	**+18h / mo**
ClickUp Unlimited (Billed Monthly at $10/user)	PKR 28,000	**PKR 12,000**	**PKR 16,000 (57%)**	**PKR 192,000**	**+18h / mo**
ClickUp Business (Billed Annually at $12/user)	PKR 33,600	**PKR 12,000**	**PKR 21,600 (64%)**	**PKR 259,200**	**+18h / mo**
ClickUp Business (Billed Monthly at $19/user)	PKR 53,200	**PKR 12,000**	**PKR 41,200 (77%)**	**PKR 494,400**	**+18h / mo**
